NEW VOLUNTEER ORIENTATION

- ▶ Community Collaboration Fiscal responsibility

# WCAS – Adoptions, Transfers and Euthanasia

- ▶ As an open admission shelter, WCAS accepts all companion animals regardless of health, behavior, or space available, with no limitation.
- ▶ All animals are given a series of tests or observed for their health and behavior to determine if they are able to go up for adoption
- ▶ WCAS works with over 200 rescue groups and many fosters to provide opportunities for animals to be transferred if necessary
- ▶ Unfortunately, some animals have to be euthanized due to their health, behavior, etc.

# National Statistics

- ▶ Approximately 6.5 million companion animals enter U.S. animal shelters nationwide every year, a decline from approximately 7.2 million in 2011.
- ▶ Approximately 3.2 million cat and dogs are adopted each year.
- ▶ About 710,000 animals who enter shelters as strays are returned to their owners. Of those, 620,000 are dogs and only 90,000 are cats.
- ▶ Since 2011 the increase in pet adoption and animals successfully returned to their owners has resulted in less animals being euthanized in US shelters.

# How Volunteers Can Help

- ▶ The animals enjoy the attention and exercise from our volunteers who provide extra love and support.
- ▶ Volunteers also spend extra time with visitors to educate them about animals for adoption, as well as programs and services.
- ▶ Community events and education programs can be expanded with volunteer support.
- ▶ Fundraising through the Winnebago County Animal Services Auxiliary (WCASA) helps Animal Services save more lives.

# What is the Winnebago County Animal Services Auxiliary?

- ▶ A non-for-profit group of animal-concerned citizens that work towards making a difference for the animals while under the care of Winnebago County Animal Services.
- ▶ WCASA strength comes from aggressive fundraising and volunteerism. The success of the Auxiliary is a direct reflection of the power and spirit of its volunteers.
